## PROFILE

Computer Science professional with a strong passion for web development demonstrated through successful projects and coursework. Proactive and initiative-taking individual, I thrive on new challenges and enjoy assuming leadership roles. In addition to my technical skills, I prioritize effective communication, fostering connections to contribute to collaborative and productive environments.

## SKILLS

- HTML | CSS | SASS | MaterialUI | Tailwind | Bootstrap | JavaScript | JQuery | TypeScript | React | Next.js | Remix | Angular | Vue.js
- Node.js | Express.js | PHP | C++ | Python | Java
- MySQL | MongoDB | PostgreSQL
- Git | OAuth | RESTful APIs | Jest | Agile | SEO | Object-oriented programming
- AWS | Azure

## EXPERIENCE

### Full Stack Developer | OpenBC

DEC 2023 - PRESENT, VANCOUVER, BC

- Contributed to the development of key features for the OpenBC website and other open-source projects.
- Managed and code review PRs to ensure coding standards, minimizing post-release issues.
- Authored comprehensive technical documentation for streamlined contributions, promoting an efficient development environment.
- Ensured code quality by writing unit tests using Jest testing library

### Software Engineer (Freelance) | BCHC

NOV 2023 - FEB 2024, VANCOUVER, BC

- Facilitated communication with BCHC project owner to gather requirements for a full-stack website.
- Designed and developed a WordPress-based MVP website, enabling quick project assessment and user feedback.
- Developed a custom CMS system to meet the organization's requirements.

## RECENT PROJECTS

### Full Stack Developer | [WeTravel](#)

- Built a full stack web application with a unique UI to assist users in discovering travel destinations that align with their preferences using AI, as well as planning their trips.
- Technologies: React, Sass, Node.js, Express.js, MySQL, Unsplash API, OpenAI API, Passport.js, Figma

### Full Stack Developer | [TaskEase](#)

- Developed responsive web-based matchmaking specializing in the seamless facilitation of short-term job opportunities.
- Technologies: React, Sass, Node.js, MySQL, Leaflet, JWT, Figma

### Full Stack Developer | [PatDoc](#)

- Built a user-friendly web app for online booking appointments and a management system for the healthcare industry to assist patients and doctors, aiming to reduce appointment errors.
- Technologies: JavaScript, JQuery, ChartJS, Bootstrap, PHP, MySQL, FDA API
